Dear Sir,

CEO, MavJay Solutions wants to share an appreciative note as given below based on the collaborative efforts in place between MavJay and JCE, Chennai benefiting both the company and the Institute.

### Testimonial

There are other objectives apart from our core products and business development as we build MavJay. Apart from CSR activities, the promoters and I wanted to engage with an institute near our development centre with a mutually beneficial exchange program. The management of JCE, Chennai and MavJay synced to take an extended internship idea forward as it is a win-win concept.

A group of students were selected based on preliminary evaluation, mainly assessing their aptitude. The students were given hands-on experience with respect to new technologies and processes which complement their regular institute curriculum. While imparting knowledge, the students' output was aligned and augmented to MavJay's requirements. Above all, the industry exposure and training, reassured the students as qualified professionals.

This program was an additional load for the students outside the institute hours. Keeping this in mind, we ensured the students did not feel the burden and at the same time engaged with interest in their continued work and learning.

We understand from the past students and the institute that this program was immensely useful and a good model to integrate.

Best Regards,

**Manoj Vijayasekar**
