KUZHANTHAIGALIN VIZHITHEZHU MOVIE” - 21st MAR 2023

On 21st March 2023, students of Jerusalem College of Engineering were screened the movie named “**Kuzhanthaigalin Vizhithozhu**”. It was an informative movie which focused on the negative impact of mobile phones on students. The movie delivered its message by depicting the lives of three school students who met their tragic ends for which the misuse of mobile phones were the sole reason. The first student lost her eye sight which was caused by the harmful rays she made her eyes subjected to, by using her phone for a long period of time. The second student who was obsessed with taking selfies lost her life when she slipped and fell of the terrace while trying to take a selfie. The final student who was not aware how this world works made online friend who forced her into the wrong path which tragically led her to taking her own life. The moral of the movie reflects on how to use mobile phones productively and not to get addicted to it. The students were warned about the dangerous side of the phones that has become a part of their lives.

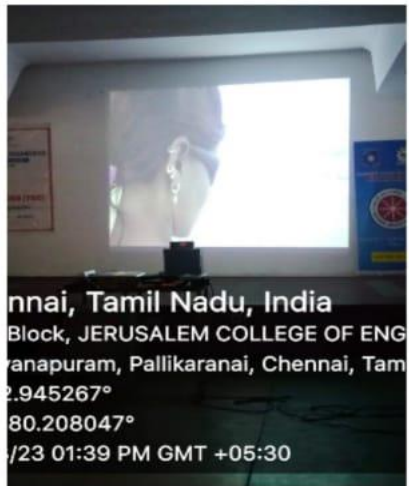

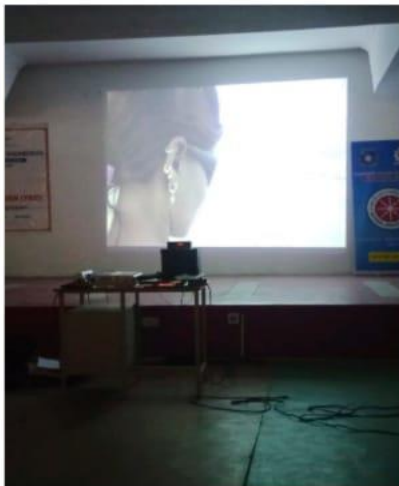

After watching the movie, we learned not to use the mobile phones for a long time, not to get addicted to it and most importantly not to make connections with unknown people. We also gained the sense of duty to create awareness among our friends and family about this crucial issue.
